Requirements for stabilisers / outriggers / ballast are based on calculations from HD1004; there is no requirement for ballast on 1,8m long 850 Ladder Span towers used internally upto 12,2m platform height or externally upto 8,2m platform height; upto 8,2m platform height the stabilisers shown satisfy the requirements for external use; above 8,2m platform height the schedule shows towers for internal use only.

PH = Platform Height; WH = Working Height (i.e. Platform Height plus 2m)

ALTERNATIVE

BALLAST:

Fencing Base (Plastic)
